Basis of presentation

These consolidated financial statements have been presented in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"), effective for the Company's reporting for the six months ended June 30, 2024.

These consolidated financial statements have been prepared under the historical cost basis and are presented in Canadian dollars, which is the functional currency of the Company and its subsidiaries.

The accounts of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

The preparation of these consolidated financial statements requires management to make judgments and estimates and form assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the statement of financial position and the reported amount of revenues and expenses during the reporting period. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in future periods affected.

These consolidated financial statements were approved for issue by the Board of Directors on August 16, 2024.

3. Acquisition of LCF

On August 23, 2023, the Company completed its acquisition of LCF whereby the Company acquired all the issued and outstanding shares of LCF for \$26,000,000 in cash and stock. An initial excess working capital was calculated at \$2,884,737 and paid in cash. An additional working capital adjustment for \$414,382 was calculated and finalized subsequent to closing. 11. Long-term debt (continued)

The Company applies judgement in the classification of long-term and short-term debt portions. The Company assumes that the prime interest rate will remain consistent or not change materially over the next twelve months. All loans are either no interest loans or have fluctuating payments that would change as the interest rate changes and the principal portion of those payments would remain constant.

On January 9, 2024, the Company made a debt prepayment of \$5,000,000 towards the principal amount on its TD Term Credit Facility. This reduced TD Term Loan #5 in Note 14 by the \$5,000,000. Monthly principal payments will remain the same and the loan will now be paid off by December 2031.

On February 8, 2024, the Company made a debt prepayment of \$193,759 towards the principal amount on its BDC loans. This reduced BDC Loan #1 and #2 by \$109,279 and \$84,480, respectively, for a total of \$193,759. On August 23, 2023, the Company entered in to an amended and restated credit facility agreement with TD Canada Trust. The agreement has four facilities. The first facility is a committed, revolving credit facility of \$7,500,000 and the second facility is a committed non-revolving reducing term credit facility which was used to finance the LCF acquisition and refinance previous facilities with TD. The third facility is a committed non-revolving reducing term credit facility used to mortgage the land and buildings of the LCF acquisition and the fourth facility is a committed, non-revolving reducing term credit facility which was used to mortgage the land and buildings of the Hi-Tec acquisition.

The credit facility with TD Canada Trust contains two financial covenants. A total leverage ratio of less than or equal to 2.75 to 1 which is tested quarterly on a twelve-month rolling basis. The second financial covenant is a fixed charge coverage ratio of greater than or equal to 1.15 to 1 to be tested quarterly on a twelve-month rolling basis. March 3, 2019	5.00	1.80%	Nil	165%	25.45%	\$0.28

April 21, 2021	5.00	0.94%	Nil	118%	24.26%	\$0.24
January 4, 2022	5.00	1.39%	Nil	94%	22.85%	\$0.43
April 21, 2022	5.00	2.78%	Nil	67%	22.08%	\$0.37
November 22, 2022	5.00	3.23%	Nil	66%	20.58%	\$0.35
December 20, 2022	5.00	3.05%	Nil	66%	20.42%	\$0.42
January 4, 2023	5.00	3.25%	Nil	66%	20.03%	\$0.43

The expected volatility is based on the historic volatility and adjusted for any expected material changes to future volatility due to publicly available information. Historical volatility is based on the daily volatility from the five years prior to the grant date due to the remaining life of the options at the grant date.

18. Financial instruments

Classification of financial instruments

The Company's financial instruments consist of cash, trade accounts receivable, accounts payable and accrued liabilities, customer deposits, and long-term debt. The Company classified and measured its cash and accounts receivable as subsequently measured at amortized cost. Accounts payable and accrued liabilities, customer deposits, and long-term debt notes are classified and measured at amortized cost.

The Company thoroughly examines the various financial instruments and risks to which it is exposed and assesses the impact and likelihood of those risks. These risks include market risk, interest rate risk, credit risk, and liquidity risk. Where material, these risks are reviewed and monitored by the Board of Directors who actively focus on securing the Company's cash flows by minimizing the exposure to volatile financial instrument risks.

18. Financial instruments (continued)

Market risk

a) Foreign exchange risk

The Company is exposed to foreign exchange risk. The Company has US non-inventory expenditures and bank accounts in US currency. The Company has had revenues from sales to the US prior to March 2020 and anticipates having revenues from sales to the US again. Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities denominated in a currency that is not the functional currency of the Company. The risk is measured through a forecast of highly probable USD transactions.

The Company minimizes the risk of the volatility of the US currency cost by keeping USD funds received from sales in USD bank accounts. These USD funds are then used for expenditures that arise in the same currency. Only at the end of the year does the Company assess the risk of transferring the excess funds to a CDN bank account. If the risk is too high, then the funds will remain in the USD account until the risk is reduced.

Profit or loss is sensitive to the fluctuations of the USD to CDN foreign exchange rates on the US revenues. If the USD foreign exchange rate were to increase by 10% with a full year of USD sales transactions based on previous sales to the US, this is estimated by management to increase sales by \$47,800 annually. The Company did not sell into the US during 2023 but has previously and anticipates selling into the US during fiscal 2024.

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's policy is to minimize interest rate risk exposures on term financing. All leases and exchangeable notes have fixed rates. As at June 30, 2024, the Company is exposed to changes in market interest rates through the bank borrowings at a floating base rate. This risk is low because changes in the prime rate are not substantial and increases would not impact the consolidated financial statements significantly. If the rates were to increase 10% this would result in an increase in interest of approximately \$155,205 over the next quarter.

Credit risk

Credit risk is the risk that a counterparty fails to meet its contractual obligation to the Company. The Company is exposed to the risk for various financial instruments through receivables from customers and placing deposits and the potential for cash fraud. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognized as at June 30, 2024 and December 31, 2023 summarized below:

	June 30,	December 31,
	2024	2023
	\$	\$
Classes of financial assets – carrying amounts

Credit risk (continued)

The Company closely monitors cash by applying a sweep account function to the subsidiary accounts and a daily bank reconciliation. The Company also requires each division to detail weekly any collection attempts of receivables over 61 days and prepares and aging account receivable report weekly to monitor any progress.

The Company also continuously monitors defaults of customers, identified individually, and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and credit checks are obtained and used. The Company's policy is to deal only with creditworthy customers.

The Company has certain trade receivables that have not been settled by the contractual due date but are not considered to be impaired. The receivables and their aging as at June 30, 2024 and December 31, 2023 is summarized below:

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations. The Company may be exposed to liquidity risks if it is unable to collect its trade and other receivables balances in a timely manner, which could in turn impact the Company's long-term ability in meeting commitments under its current facilities.

The Company manages its liquidity needs by monitoring scheduled debt servicing payments for long-term financial liabilities and debt servicing ratios. The Company also forecasts and manages cash inflows and outflows on a daily, weekly and monthly basis.

The Company considers expected cash flows from financial assets in assessing and managing liquidity risk, in particular its cash resources and trade receivables. The Company's existing cash resources and trade receivables exceeds the current cash outflow requirements as our current ratio is currently 4.16:1. Cash flows from trade accounts receivable are all contractually due within thirty days.
