Supplemental cash flow information – Note 20

1. Nature of operations, basis of presentation and consolidation

Nature of operation

Atlas Engineered Products Ltd. (the "Company" or "Atlas") was incorporated pursuant to the provisions of the Business Corporations Act (British Columbia) on January 18, 1999. Atlas Engineered Products Ltd. is a leading manufacturer of trusses, wall panels, and supplier of engineered wood products. Atlas operates manufacturing and distribution facilities in British Columbia, Saskatchewan, Manitoba, Ontario, and New Brunswick to meet the needs of residential and commercial builders.

The Company's registered office is located at 2005 Boxwood Road, Nanaimo, British Columbia V9S 5X9.

Basis of presentation

These consolidated financial statements have been presented in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"), effective for the Company's reporting for the six months ended June 30, 2026.

These consolidated financial statements have been prepared under the historical cost basis and are presented in Canadian dollars, which is the functional currency of the Company and its subsidiaries.

The accounts of the subsidiaries are prepared for the same reporting year as the parent company, using consistent accounting policies.

The preparation of these consolidated financial statements requires management to make judgments and estimates and form assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the statement of financial position and the reported amount of revenues and expenses during the reporting year. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in future periods affected.

These consolidated financial statements were approved for issue by the Board of Directors on August 24, 2026.

Basis of consolidation

The Company's consolidated financial statements consolidate those of the parent company and all its subsidiaries as of the date that control was obtained over those subsidiaries. The Company has ten subsidiaries, all located in Canada, Clinton Building Components Ltd. ("Clinton"), Satellite Building Components Ltd. ("Satellite"), Atlas Building Systems Ltd. ("ABS"), Pacer Building Components Ltd. ("Pacer"), South Central Building Systems Ltd. ("SC"), Novum Building Components Ltd. ("Novum"), Hi-Tec Industries Ltd. ("Hi-Tec"), Léon Chouinard et Fils Co. Ltd./Ltée. ("LCF"), Truss-Worthy Construction Systems Inc. ("Truss-Worthy") and Penn-Truss Mfg. Inc. ("Penn-Truss"). The Company owns 100% of the issued and outstanding shares of all of these subsidiaries.

All transactions and balances between the Companies are eliminated on consolidation, including unrealized gains and losses on transactions between the companies. Amounts reported in the unaudited condensed interim consolidated financial statements of the subsidiaries have been adjusted where necessary to ensure consistency with the accounting policies adopted by the Company.

Profit or loss and other comprehensive income of subsidiaries acquired or disposed of during the year are recognized from the effective date of acquisition, or up to the effective date of disposal, as applicable.

2. Acquisition of Truss-Worthy

On May 30, 2025, the Company completed its acquisition of Truss-Worthy Construction Systems Inc. ("Truss-Worthy") whereby the Company acquired all the issued and outstanding shares of Truss-Worthy for $1,575,000 in cash. A closing working capital adjustment of $83,244 was finalized and paid in cash subsequent to closing. In a separate transaction, the Company also purchased the land and buildings for $850,000 in cash from the pre-existing landlord.

Truss-Worthy is located in Colborne, ON. Truss-Worthy is a manufacturer of roof trusses and a supplier of engineered wood products. The acquisition has given the Company greater access to the Southern Ontario market, east of Toronto. Truss-Worthy is in the same town as the 42-acres of land acquired in December 2024 by the Company. This location will bring the Company a customer base and presence to the area prior to the potential development of this additional property.

The intangible assets acquired relate to customer relationships and a non-compete agreement, which were recorded at $46,000 and $175,000 at the date of acquisition, respectively. Management applied significant judgment in estimating the fair values of those intangible assets. To estimate the fair values of the intangible assets, management used the "Multi-period Excess earnings method" to value customer relationships, and the "With and Without method" to value the non-compete agreement, using discounted cash flow models. Management developed significant assumptions related to revenue growth rates, gross margin, EBITDA forecasts, customer retention rates, and discount rates when determining the fair value of those intangible assets, as applicable.

In accordance with IFRS 3, the Truss-Worthy acquisition has been accounted for as a business combination. The purchase price allocation as at December 31, 2025 has been estimated as follows:

Category	$
Cash	1,575,000
Excess Working Capital	83,244
Total consideration	**1,658,244**

Goodwill	383,497
Accounts payable and accrued liabilities	(77,375)
Deferred income tax liability	(238,386)

If the acquisition had occurred on January 1, 2025 then the revenues would have been $1,614,643. The following table shows the results of the operations of Truss-Worthy since the acquisition date.

3. Acquisition of Penn-Truss

On July 24, 2025, the Company completed its acquisition of Penn-Truss MFG Inc. ("Penn-Truss") whereby the Company acquired all the issued and outstanding shares of Penn-Truss for $3.8 million. $760,000 of the purchase price will be due nine months post-closing and $760,000 in shares of AEP at the discretion of AEP and based on the performance of Penn-Truss for fiscal 2025. The performance component has been determined based on adjusted EBITDA and was finalized. The Company elected to issue 1,091,954 shares to settle the performance component. The remaining purchase price was paid for in cash at closing. Working capital deficiency for $70,526 was calculated and finalized subsequent to closing.

Penn-Truss is located in Saltcoats, SK. Penn-Truss is a manufacturer of roof and floor trusses and a supplier of engineered wood products. The acquisition has given the Company access to the Saskatchewan market as Penn-Truss is the first location in this province. Penn-Truss is close enough to the Company's SC location to provide some synergies between these two locations when it comes to management, employees, skills, training, equipment, and strategic sales options.

In accordance with IFRS 3, the Penn-Truss acquisition has been accounted for as a business combination. The purchase price allocation as at December 31, 2025 has been estimated as follows:

5. Government grant receivable

During the six months ended June 30, 2026, the Company incurred $4.0 million in eligible expenditures in accordance with the terms of the agreement. The Company received a portion of the grant funding during the period, and as at June 30, 2026, with $400,000 remaining receivable. Accordingly, a government grant receivable has been recognized for the portion of eligible expenditures incurred for which reimbursement is expected.

The contribution is accounted for as a government grant in accordance with IAS 20 – Accounting for Government Grants and Disclosure of Government Assistance. Government grants are recognized when there is reasonable assurance that the Company will comply with the conditions attached to the grant and that the grant will be received.

The grant relates to the acquisition and construction of qualifying capital assets. As such, the grant is recognized initially as a deferred government grant liability and is amortized to income on a systematic basis over the useful lives of the related assets, consistent with the recognition of the associated depreciation expense. Any portion of the grant related to eligible expenditures incurred but not yet received is recognized as a government grant receivable.

Market risk

a) Foreign exchange risk

The Company is exposed to foreign exchange risk. The Company has revenues, US non-inventory expenditures and bank accounts in US currency. Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities denominated in a currency that is not the functional currency of the Company. The risk is measured through a forecast of highly probable USD transactions.

The Company minimizes the risk of the volatility of the US currency cost by keeping USD funds received from sales in USD bank accounts. These USD funds are then used for expenditures that arise in the same currency. Only at the end of the year does the Company assess the risk of transferring the excess funds to a CDN bank account. If the risk is too high, then the funds will remain in the USD account until the risk is reduced.

Profit or loss is sensitive to the fluctuations of the USD to CDN foreign exchange rates on the US revenues. If the USD foreign exchange rate were to increase by 10% with a full year of USD sales transactions based on previous sales to the US, this is estimated by management to increase sales by $263,107 annually.

Market risk (continued)

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's policy is to minimize interest rate risk exposures on term financing. All leases and exchangeable notes have fixed rates. As at June 30, 2026, the Company is exposed to changes in market interest rates through the bank borrowings at a floating base rate. This risk is low because changes in the prime rate are not substantial and increases would not impact the consolidated financial statements significantly. If the rates were to increase 10% this would result in an increase in interest of approximately $38,162 annually.

Credit risk

Credit risk is the risk that a counterparty fails to meet its contractual obligation to the Company. The Company is exposed to the risk for various financial instruments through receivables from customers and placing deposits and the potential for cash fraud. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognized as at June 30, 2026 and December 31, 2025 summarized below:

	June 30, 2026	December 31, 2025
	$	$

Trade accounts receivable, net of loss allowance	8,366,352	8,494,168
	8,366,352	10,886,954

The Company closely monitors cash by applying a sweep account function to the subsidiary accounts and a daily bank reconciliation. The Company also requires each division to detail weekly any collection attempts of receivables over 61 days and prepares and aging account receivable report weekly to monitor any progress.

The Company also continuously monitors defaults of customers, identified individually, and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and credit checks are obtained and used. The Company's policy is to deal only with creditworthy customers.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations. The Company may be exposed to liquidity risks if it is unable to collect its trade and other receivables balances in a timely manner, which could in turn impact the Company's long-term ability in meeting commitments under its current facilities.

The Company manages its liquidity needs by monitoring scheduled debt servicing payments for long-term financial liabilities and debt servicing ratios. The Company also forecasts and manages cash inflows and outflows on a daily, weekly and monthly basis.

The Company considers expected cash flows from financial assets in assessing and managing liquidity risk, in particular its cash resources and trade receivables. The Company's existing cash resources and trade receivables exceeds the current cash outflow requirements as our current ratio is currently 1.46:1. Cash flows from trade accounts receivable are all contractually due within thirty days.
