Forward Looking Statements

Disclaimer

This presentation is not, and nothing in it should be construed as, an offer, invitation or recommendation in respect of securities of Atlas Engineered Products Ltd. (the “Company”), or an offer, invitation or recommendation to sell, or solicitation of an offer to buy, the facilities or the securities of the Company in any jurisdiction. Neither this presentation nor anything in it shall form the basis of any contract or commitment.

This presentation is not intended to be relied on as advice to investors or potential investors and does not take into account the investment objectives, financial situation or needs of any investor. All investors should consider such factors in consultation with a professional advisor of their choosing when deciding if an investment is appropriate. The Company has prepared this presentation based on information available to it, including information derived from public sources that have not been independently verified. No representation or warranty, express or implied, is provided in relation to the fairness, accuracy, correctness, completeness or reliability of the information, opinions or conclusions expressed herein. These projections should not be considered a representation of the Company’s potential cash-generation performance in any way.

The financial modelling is a projection, preliminary and subject to change. All forward-looking statements attributable to the Company or persons acting on its behalf apply only as of the date of this document and are expressly qualified in their entirety by the cautionary statements included elsewhere in this document. The financial modelling is a projection, is preliminary, and is subject to change; the Company undertakes no obligation to update or revise these forward-looking statements to reflect events or circumstances that arise after the date made or to reflect the occurrence of unanticipated events. Inevitably, some assumptions will not materialize, and anticipated events and circumstances may affect the ultimate financial results. Projections are inherently subject to substantial and numerous uncertainties and to a wide variety of significant business, economic, and competitive risks, and the assumptions underlying the projections may be inaccurate in any material respect. Therefore, the actual results achieved may vary significantly from the forecasts, and the variations may be material.

Key Investment Highlights

Atlas Engineered Products is the market leader in Canada of manufactured and engineered structural wood products for residential and commercial construction

Established platform serving Canadian and U.S. markets from eight manufacturing facilities

Supportive macro & political backdrop in Canada with structural shortage of 3.5M homes by 2030 in a declining interest rate environment

Track record of highly accretive M&A with 8 transactions since 2017 at avg. 3x EBITDA and significant pipeline to further expand footprint

Well-defined organic growth opportunities through robotics & automation and cross border sales channels

5-Year Revenue and EBITDA CAGR of 12.5% & 17.2%, respectively (~20% EBITDA margin); active on 10% NCIB announced in November 2024

Proven and well-aligned management team with ~14% insider ownership

Capital Structure (April 30, 2025)

AEP Family of Companies

A Growing National Footprint

Since our inception as AEP in November 2017, we have grown to eight companies.

Our vision is to create a national family of operating companies deeply entrenched in serving regional construction markets. We are strengthening financial and operational performance of these acquired companies through standardized best practices, dedicated sales outreach, cost efficiencies, and extended product mix. And we intend to continue our strategic acquisition path.

Our Services

Design, Engineering & Permitting

Our specialist design team uses cutting edge design and engineering technology that ensures you get consistent, accurate, top quality product from our facility. We even help with acquiring building permits.

AEP's team of designers employs state-of-the-art BIM (Building-Information-Modeling) software, laser precision cutting equipment and automated assembly equipment to produce your orders in a controlled indoor factory environment.

Our Products

Roof Systems & Roof Trusses

Reduce installation times, increase your span options and employ our cost effective, cutting edge design and engineering team.

From the simplest residential building to the most complex commercial designs, AEP roof trusses can be a cost effective and efficient part of your construction project.

Our Products

Floor Systems & Floor Trusses

A practical alternative to framing onsite, our custom-built floor panels give you greater quality control and ensure seamless integration with your wall and roof components.

Quality floor systems and floor trusses from a production facility that also allows customers to reduce on site labour needs or simultaneously work on that next project.

Our Products

Wall Panels

A cost-effective alternative to framing onsite, AEP wall panels give you greater quality control, ability to reduce on site labour requirements, and ensure a seamless integration with your floor and roof components.

Our specialized design software and manufacturing capacity ensures that your walls are square, with proper nailing patterns, and with studs and headers engineered to support applied loads.

Our Clients

Single-Family Home Builders

Multi-family, Highrise & Sub-Division Developers

Commercial & Industrial Developers

Lumber & Specialty Building Yards

Why Do **Clients** Choose Us?

We save them money

- + Cost effective and efficient
- + National buying power
- + Best-in class design, production and automation technology

We save them time

Offsite customized manufactured roof & floor trusses and wall panels can be installed onsite up to 5x's faster than traditional stick frame construction

We provide expanded product offerings

Roof, wall and floor systems and engineered wood products - offering customers a one-stop product delivery

We are environmentally friendly

- + Uses less energy to manufacture
- + Responsible and renewable
- + Fewer emissions and waste

Industry Tailwinds

“To restore affordability, an additional 3.5M affordable housing units are needed by 2030.”

- CMHC

Canada is on track to break ground on about 210,000 housing units this year but about 100,000 additional housing starts are needed this year and next, as Canada continues to admit large number of immigrants.

- Globe and Mail & Desjardins Securities

Federal government reveals plan to bring in >350,000 immigrants per year through 2027 (1% of population thereafter)

- CBC

Supportive Political Landscape in Canada

All political parties are unanimously committed to accelerating building activity with urgency. An elected **Liberal minority government** supports a best-of-both-worlds policy scenario to catalyze the industry.

Liberal Party

- + **Promising to double numbers of homes built annually to nearly 500,000**
- + Creating **Build Canada Homes**, Canada's most ambitious housing plan since World War 2
- + Build affordable housing at scale
- + Catalyzing new housing industry
- + Provide financing to **affordable homebuilders**
- + "Unleash the power of public/private co-operation at a scale not seen in generations" - Mark Carney, Prime Minister

Conservative Party

- + **Campaigned with promise to build 2.3M homes by 2030 (~450,000/yr)**
- + Cutting taxes on new homes
- + Freeing up federal land
- + Incentivizing municipalities to make building easier and cheaper
- + Simplifying National Building Code & cutting red tape
- + Prioritizing homebuilders who can **build affordable homes**
- + "We will build more tax less, and get the government out of the way" - Pierre Poilievre, Conservative Party leader

Growth Initiatives

Organic Growth

- + Equipment upgrades, automation, and technological improvements
- + Product diversification
- + Sales and territory expansion
- + Manufacturing capacity growth
- + Integration efficiencies

M&A Growth

- + Constantly assessing M&A targets for potential acquisitions
- + Is the geographical location ideal, does it fit with our other locations, is there sales growth potential
- + Are integration efficiencies available
- + Is there automated equipment
- + Is the price right!

Organic Growth Initiatives

Product Diversification

- + Wall panel expansion
- + EWP expansion
- + Explore new products that add synergies with our current products and add value for our customer base

Sales Team Development

Continue to develop new talent with technical experience to provide our customers with the best products for efficiency and ease

Equipment Automation

Continue automating and upgrading equipment across all locations when and where financially prudent for growth

Equipment Utilization

Hire and train manufacturing workforce to increase equipment utilization and manufacturing capacity with more shifts that can produce quality products for our customers

Advancing Robotics Capabilities

AEP is establishing Canada's inaugural platform of robotic truss manufacturing plants to drive significant value creation

Key Highlights of Robotics Rollout

Increase output capacity by 100%

Reduce labor inputs by 50%

Payback period <2 years

Fully-funded to execute

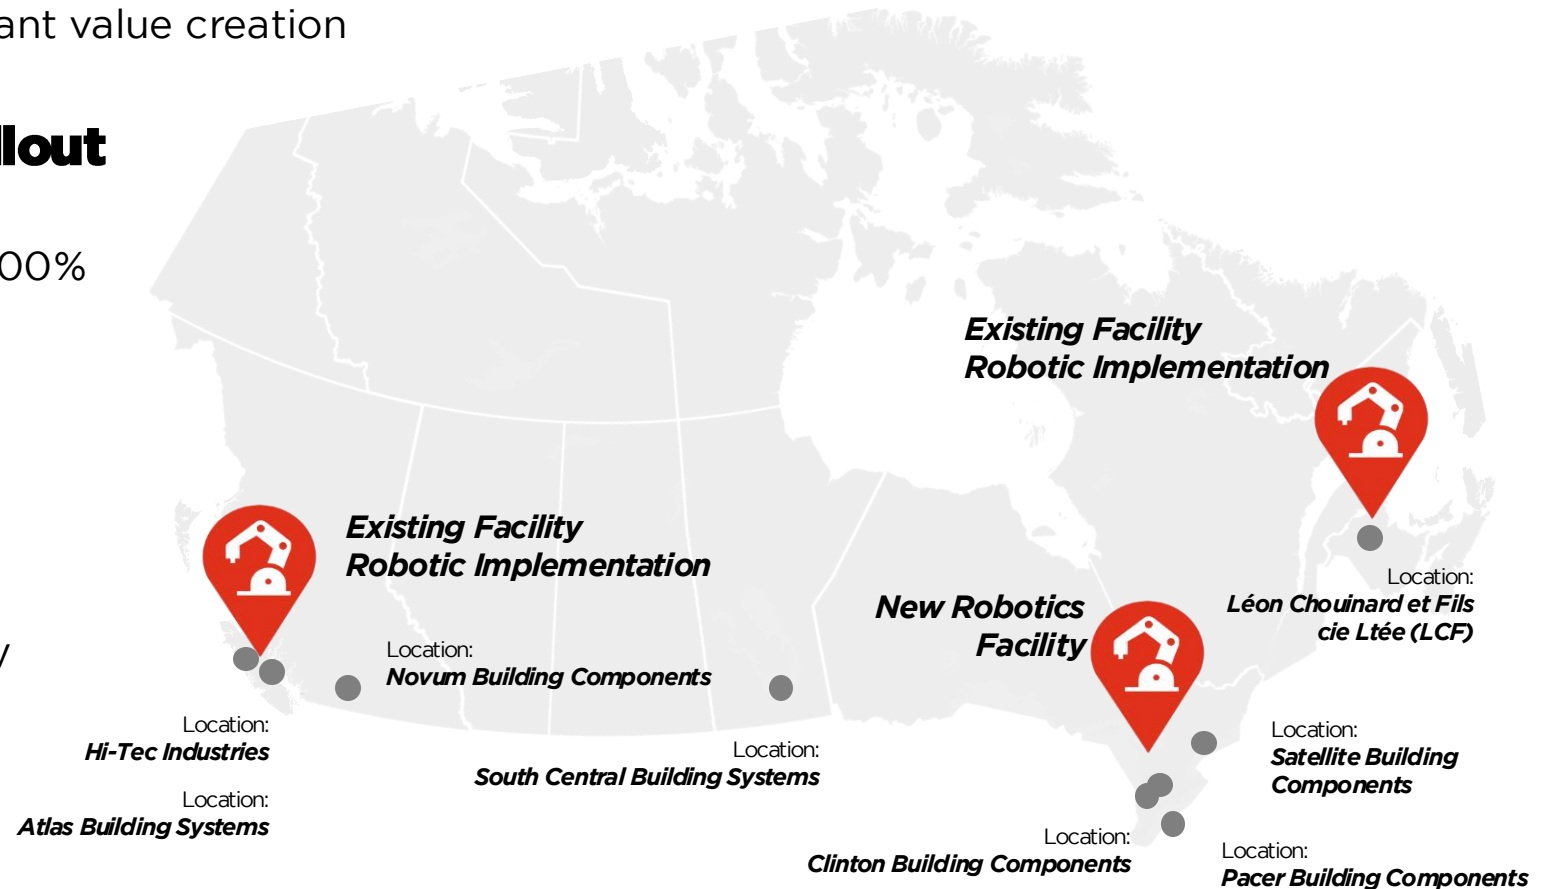

Low-risk & proven technology

Improve safety

Minimize materials waste

M&A Growth

M&A is an ongoing part of our growth initiatives. We are constantly assessing potential M&A targets and will announce acquisitions as they develop.

Fragmentation

- + The manufactured wood products industry is characterized by hundreds of small regional operators with sales in the range of \$3 to \$15 million, headed by owner-managers that need succession planning
- + These small regional operators are unable or unwilling to invest in technology and automation

Opportunity

AEP is providing an opportunity for many of these small operators.

- + To profit from operational efficiencies, technological advances, advantages of scale in procurement, and expanded product distribution
- + For arbitrage as acquired companies transition from private ownership to public amid varying transaction structures and prices

M&A Growth

AEP is well positioned to eliminate the industry's two biggest pain-points.

Size of Canadian Market ¹

Large fragmented market unprepared for disruption

Acquisition Growth

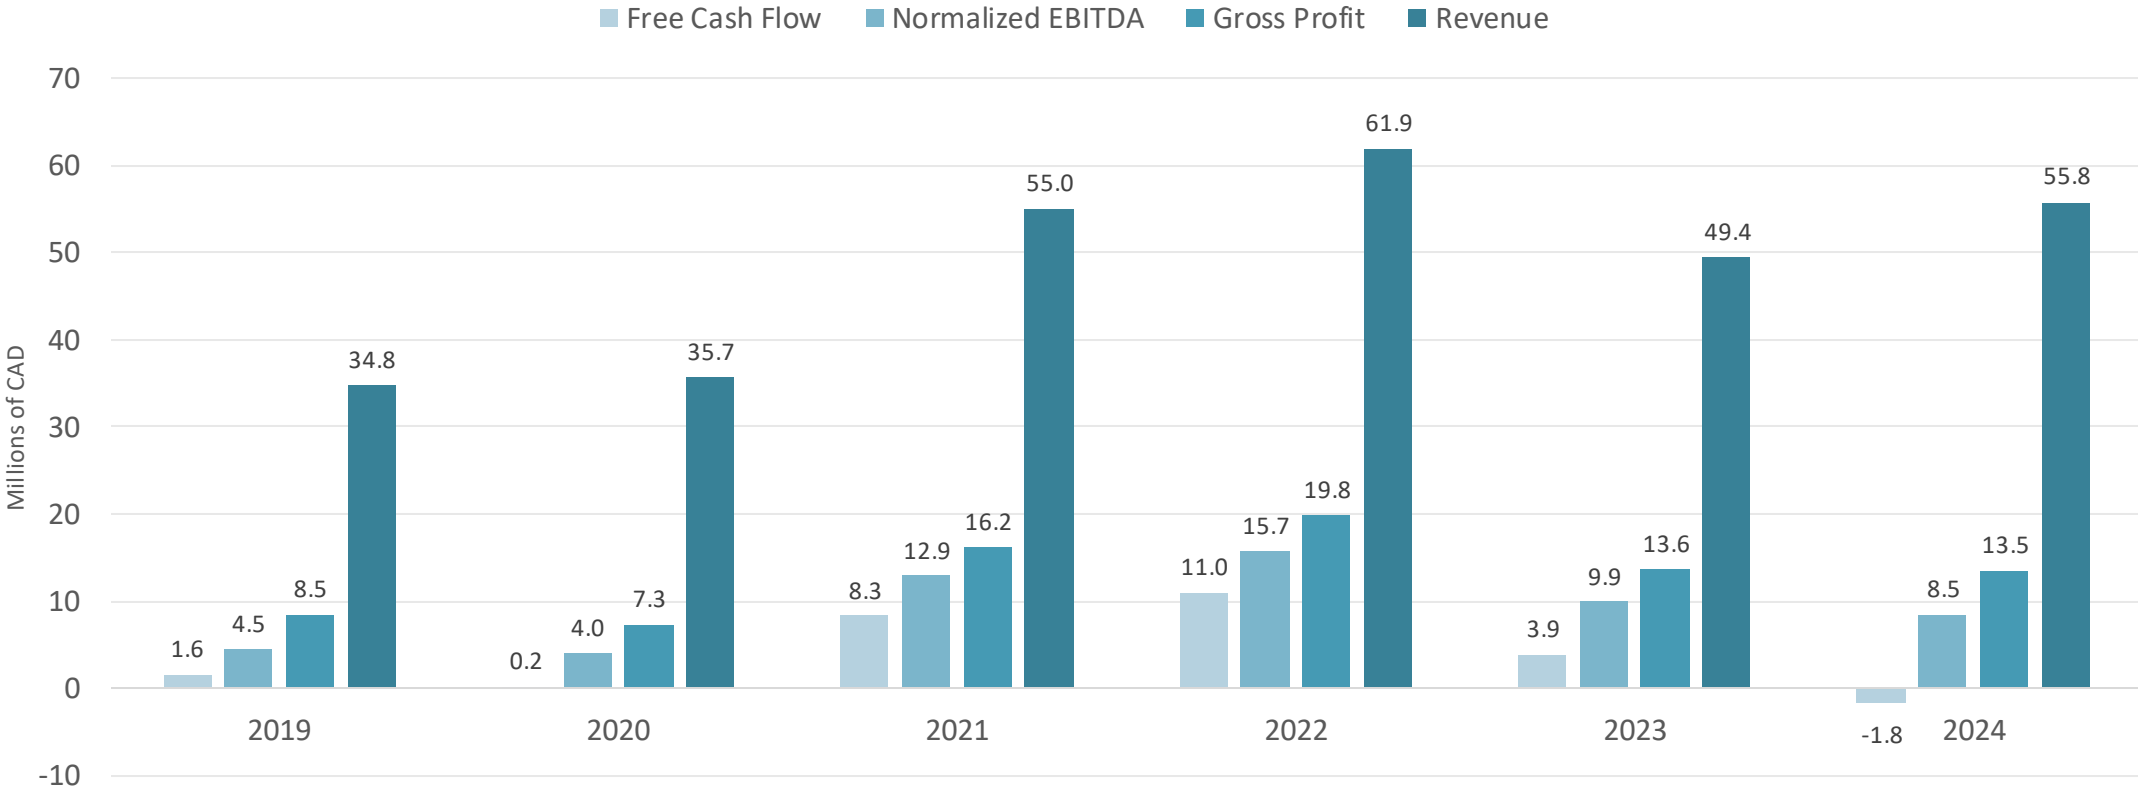

Integration Impacts

- + Integration is key after a share or asset acquisition. The Company aims to implement national buying power, system upgrades, technological improvements, and processes to improve efficiencies at each location
- + The table shows the potential EBITDA improvements with acquisitions in their various stages of the integration process
- + Share Acquisition 1: Integration completed, organic growth initiatives in progress
- + Share Acquisition 2: Integration completed, start of organic growth initiatives

	Sales (avg)			EBITDA (avg)		
	Before Acquisition	2020	2021	Before Acquisition	2020	2021
Share Acquisition 1	\$1.8M	\$3.1M	\$5.6M	9%	27%	38%
Share Acquisition 2	\$15M	\$11M	\$18M	7%	17%	31%

Annual Performance

Executive Team

Hadi Abassi

CEO & President, Founder

Mr. Abassi founded AEP in 1999 in Nanaimo, BC and they manufactured roof trusses for Vancouver Island. Bringing more than 25 years of experience to the role, Hadi is an incredible relationship builder and brings his extensive experience in sales, M&A and the wood products industry to AEP as its CEO & President. Mr. Abassi's significant experience developing successful teams specializing in sales, design, and production will be invaluable to future growth and development.

Melissa MacRae CPA, CA

Chief Financial Officer

As CFO, Mrs. MacRae provides overall leadership and direction for the Company's financial operations as she oversees accounting, financial planning and analysis and information technology. Melissa started with AEP in 2012 by spending significant time learning the entire operation from sales, to design, to production, and finance. This knowledge has been invaluable as AEP has become a public company. Mrs. MacRae progressed from her initial role to Controller, Group Controller and then Director of Finance. In 2019, Melissa joined the Executive Team as Interim CFO before being promoted to CFO in Jan 2022. In addition to her CPA designation, Melissa holds a Bachelor of Business Administration from Vancouver Island University.

Gurmit Dhaliwal

Chief Operating Officer

As COO: Ms. Dhaliwal leads the development of the overarching operational strategy for all locations across Canada. Gurmit is a results-oriented leader with 20 years' experience in the wood products industry. Gurmit provides innovation and strategic methods to improve processes while encouraging and developing organic growth initiatives. Specialized in shaping operational strategies based on her well-rounded knowledge of the entire business, Gurmit leads her team to achieve increased revenue, profitability, productivity and high-quality customer satisfaction. Ms. Dhaliwal holds a Business Administration Diploma in Finance from Vancouver Island University.

Board of Directors

Don Hubbard, ICD.D

Board Chair

Mr. Hubbard is currently President and CEO of Hubbard Consulting Ltd., and Owner of RCR Mining LLP. He was also Board Chair of the Vancouver Island Health Authority from 2010-2017. Formerly Mr. Hubbard was General Manager of Lafarge North West Division and Island operations.

Greg Smith

Director

Mr. Smith is President of Broadway Refrigeration & Air Conditioning Co. Ltd. and Omega Mechanical Ltd and is Chairman of Lite Access Technologies. He previously held senior positions in investment banking before transitioning to private equity with the acquisition of one of the largest HVAC companies in Western Canada.

Hadi Abassi

Director, CEO & President, Founder

Mr. Abassi founded AEP in 1999 in Nanaimo, BC and they manufactured roof trusses for Vancouver Island. Bringing more than 25 years of experience to the role, Hadi is an incredible relationship builder and brings his extensive experience in sales, M&A and the wood products industry to AEP as its CEO & President. Mr. Abassi's significant experience developing successful teams specializing in sales, design, and production will be invaluable to future growth and development.

Kevin Smith

Director

Mr. Smith is a Chartered Accountant and the Chief Financial Officer of Northland Properties Corporation. He previously served as Chief Financial Officer of IntraCorp Projects Ltd from 2012-2020 and as Chief Financial Officer, Executive Vice President, and Corporate Secretary at Whistler Blackcomb where he successfully led an initial public offering in 2010. He is a Director of Lite Access Technologies Inc. Mr. Smith holds a Bachelor of Science from the University of British Columbia.

Paul Andreola

Director

Mr. Andreola has over 25 years of business development and financial markets experience including senior management, marketing, and communications roles for early-stage companies. Previously in his career, Mr. Andreola was a licensed investment advisor for over 10 years and has facilitated multiple early stage private and public companies in the industrial, life science, and technology sectors. Mr. Andreola is currently the CEO and director of NameSilo Technologies Inc. (CSE:URL) and a director of Departure Bay Capital Corp. (TSXV:DBC.P).

A worker wearing a black cap, a face mask, and a high-visibility yellow safety vest with orange reflective stripes is operating a large industrial machine. The machine is blue and white, with a control panel featuring a monitor and several buttons. The worker is pointing at the control panel. The machine has 'Mitek BLADE' written on it. In the background, there are large bags of material, one of which has 'CANTER' written on it. The overall scene is dimly lit, suggesting an industrial or warehouse environment.
